Naming Options

Compass Corrections Canada

Corrections is a sensitive subject, and for many in the general public, it is something they prefer not to dwell on. The challenge lies in creating a brand identity that acknowledges the gravity of the sector while still projecting a balanced and positive outlook.

Compass currently operates across 10 defined sectors, and this initiative would formally introduce an 11th sector with its own distinct identity.

One proposed option is “Sector 11”—a title that strikes a careful balance between being neutral and serious, while also aligning with the naming conventions often used for government facilities.

SECTOR 11

Secure Site Services

SECTOR 11

Nourishing Better Futures

BALANCED STRENGTH

Strengths:

Clean, professional, and modern — mature without being intimidating. Bold condensed typography communicates authority and seriousness while remaining approachable. “Sector 11” positions this as a distinct identity under Compass, aligned with the other 10 sectors but differentiated.

Considerations:

The name may feel abstract at first and could require explanation. It is strong for internal/structural alignment but less obvious for external audiences unless paired with storytelling.

11

FEEDING BRIGHTER HORIZONS

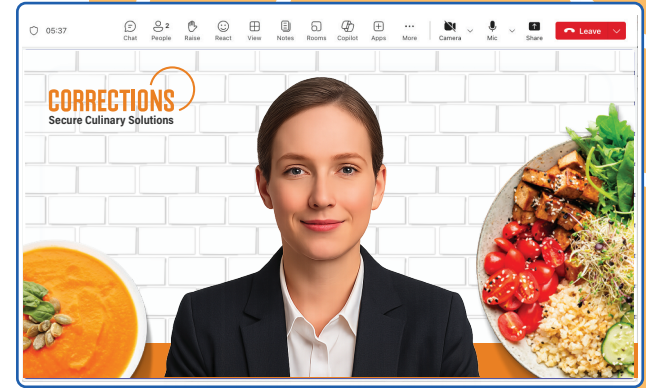

Strengths:

Immediately clear what the sector is. The offering “feeding Brigher Horizons balances safety, expertise, and food service in plain language — ideal for RFPs and external clients.

The orange arc adds visual energy, suggesting completeness and forward motion.

Considerations:

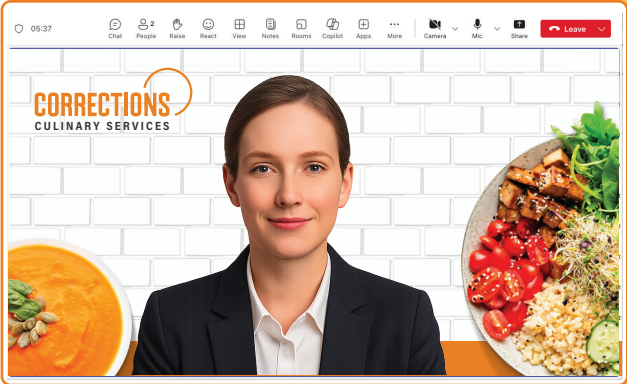

Retains the word “Corrections,” which may feel heavy or stigmatized for some audiences.
